Dear Rob,

On behalf of the Western Regional Network policy committee, we want thank your for the discussion about the future of collaboration with Internet2 at the Fall 2010 Internet2 member meeting in Atlanta, GA on November 3, 2010.

We agreed to provide a communication regarding Internet2's additional option delivered to Connectors to secure a second 10gb network port. We think connectors will continue to innovate with these innovative options delivered by Internet2. WRN extended our service portfolio by way of the second network connection for our multiple regional optical network collaborators. In general, we appreciate Internet2's willingness to extend additional connection offerings that improve our service to our regional collaborators.

Please find the attached WRN advice on Internet2's 2xN service. We welcome the opportunity to continue the dialogue.

Sincerely,

Gil Gonzales, PhD

CIO, University of New Mexico

Chair, Western Regional Network
